SKILLCERTPRO

1.1. Management - Azure Cloud Shell

Azure Cloud Shell

- Browser-accessible shell for managing Azure resources
 - Can provide Bash or PowerShell
- `C` In background it uses dockerized version of PowerShell / bash
- When you open it for the first time →
 - i. It creates a new storage account called azcloudshell1 and some numbers
 - ii. It then creates a file share that stores your user information.

1.2. Management - Resources & Costs.

Subscriptions

Resource tagging

- Always tag!
- Tags are additional metadata that can be assigned to resources/resource groups.
 - Child resources do not inherit resource groups tags
 - Max 15 tag name/value pairs.
 - E.g. CostCenter = YH2
- Why?
 - Organize
 - Search
 - View
 - Billing & cost managements
